

PROFESSIONAL HEALTH STUDIES

ASSOCIATE OF SCIENCE

Why should I consider an associate degree in Professional Health Studies?

The demand for health care professionals is skyrocketing. The Associate of Science degree in Professional Health Studies prepares students to pursue a variety of educational opportunities in health fields, such as nursing, dental hygiene, medical technology, radiography, occupational therapy, physical therapy, respiratory therapy, medical school or veterinary school.

The curriculum is composed of courses in biological and physical sciences, which is complemented by Ancilla's core of liberal arts subjects. In addition to classroom coursework, the program offers hands-on laboratory experience. Ancilla College strives to produce graduates who are broadly educated with the ability to make logical decisions, manage groups effectively, and communicate well.
